RMail™
By RPOST

Email Security & Compliance

Certify Delivery, Prevent Business Email
Compromise, Human Error &
Data Loss, Send for eSign, and More.

Customer Stories

The United Nations organizes legal intellectual property treaties for most nations on Earth. We've been helping them deliver critical and time sensitive legal notices to nearly every law firm and corporation worldwide that manages an international intellectual property portfolio. We provide them internationally accepted proof of legal delivery via Registered Email™ receipts.

Key Features

RMail seamlessly installs onto Microsoft Outlook, Gmail, Salesforce and more to provide senders with advanced email compliance and security tools that are intuitive and efficient. Additionally, RMail can be implemented as a Cloud Gateway Perimeter, leveraging AI and rules-based policies for automated security and compliance.

Certified Email Delivery

Proof of who said what and when, by email.
RMail's Registered Email™ service provides senders with a Registered Receipt™ email record for timestamped and auditable proof of send and delivery. The court-accepted Registered Receipt™ is self-contained (it does not require any other record to be stored anywhere) and may be shared with the recipient(s) to authenticate in the event of a dispute.

BEC Protection

Stop cybercrime in the making with our Pre-Crime Intelligence module.
Business Email Compromise (BEC) is the leading cause of wire fraud, one of the most financially damaging vectors of cybercrime. RMail Eavesdropping Alerts detects cybercrimes targeting you at recipient compromised accounts, and Impostor Email Detection alerts senders of clever lookalike domains and reply-hijack scams.

Human Error and Data Loss Prevention

Email security humanized.
RMail Recommends™ automatically sensitizes users of their need to treat specific messages differently, based on email content and attachments, all within the flow of sending an email. Additionally, Redact+™ empowers senders to tag particularly sensitive parts of an email such that they are removed from the email body, safeguarding the content for the future life of the thread.

RMail eSign

Quick eSignature for your emails.
With a simple click, transform emails and attachments into eSign-ready envelopes and receive the corresponding legally-binding eSign record.

& More

Why We Are Unique

Our features provide the best user experience. Our prices make us the most affordable. And our services connect elegantly inside your existing email programs and business systems.

Digital Seal™

Sign and timestamp your email transmissions to extend peace-of-mind beyond your organization to your entire network.

Agile Deployment

Our Dedicated Customer Success Managers ensure a seamless onboarding and the best customer experience, guiding your organization through digitalization step-by-step, assisting in objectives definition, training, account management and more.

Large file share

Send emails with up to 1GB of attachments.

Accessible, Flexible and Scalable

RMail flexible pricing model adapts to organizations from all industries, sizes and regions. Designed to provide accessibility and scalability, our variety of plans may be combined to ensure organizations pay only for what they need; no hidden prices, no extra costs.

SideNote

Send a private note only visible to the To, CC or BCC field.

Service-Oriented

We believe that excellent technology is key and outstanding service is gold, and we are proud to provide both. That's why our teams are above all knowledgeable and friendly to work with. Your Customer Success Manager will always be there for you, one phone call or email away.

Disappearing Ink™

Send confidential information set to self-destruct on a timer or following a specific number of views.

Breadth of Services

RMail empowers your organization with all of the functionality you need; all in one installation onto the platforms you're already using certified proof, AI-infused human e-security error prevention, in-the moment personalized e-security training, eSignatures, and much more.

More than **25 million people** have relied upon our secure email services **since 2000.**
