ThriveDX

Introducing ThriveDX

The world's premier cybersecurity and digital skills provider.

ThriveDX's Human Factor Security focuses on **understanding** and **mitigating** the cyber risks posed by human behaviour and actions.

The Human Factor Security market is surging, estimated in Europe at \$5B ARR annually, as organizations have realized the importance of investing in technologies and processes against these types of threats.

Exclusive Networks on Demand X-OD and ThriveDX are working together to advance the state of the human factor in cybersecurity.

95%

of all cybersecurity incidents involve the human factor

\$4.35M

is the global average total cost of a data breach

87%

of CISO's state that security awareness is mandatory for maintaining security levels

Solutions

Security Awareness Training

Developed by former ethical hackers and cyber military defence experts, our behaviour-changing phishing and awareness solution effectively trains employees and reduces the risk of threats, vulnerabilities, and attacks

Application Security Training

This is a revolutionary secure code training based on real-world interactive scenarios. Developers will learn to think like a hacker to identify vulnerabilities in their code to mitigate and prevent future attacks

More about ThriveDX

ThriveDX specialises in end-to-end cybersecurity training and talent solutions which tackle human error from a 360° approach.

The ThriveDX suite arms employees with the know-how, skills, and behaviors to prevent cyber risks, vulnerabilities, and threats to your business. Through their methodology, staff from both technical and non-technical business functions receive training that is practical and tailored for their roles.
