Don't leave your customers exposed: Secure the future of identity management with Thales SafeNet Trusted Access (STA) on X-OD

The cloud era is here, and small and medium-sized businesses (SMBs) are scrambling to adapt. Hybrid and multi-cloud strategies offer flexibility and agility, but they also create new security challenges. Are your customers exposed to unauthorised access and data breaches?

Thales SafeNet Trusted Access (STA) positions you, the MSP, as the go-to expert in securing your customers' cloud environments. This integrated platform provides a powerful, yet user-friendly, Identity and Access Management (IAM) solution built specifically for your needs.

Thales STA is now available on X-OD for MSPs deploying for 500 users or less.

Here's what sets STA on X-OD apart:

Effortless Onboarding:
Click-and-deploy functionality means you can secure your customers in minutes, not days.

Flexible Licensing:
Pay-as-you-go with ability to increase or decrease the number of users and eliminate upfront costs, making it perfect for SMBs.

Recurring Revenue:
Boost your profitability with a predictable income stream from flexible subscription options.

Enhanced Customer Value:
Stand out from the competition by offering your customers a user-friendly, cost-effective IAM offering and a rock-solid security posture.

Benefits for your customers:

Watertight Security:
Protect legacy and cloud applications and mitigate the risk of unauthorised access with multi-factor authentication (MFA) and common zero trust access policy rules.

Seamless Experience:
Boost user productivity with single sign-on (SSO) and a diverse choice of passwordless authentication methods.

Cost Optimisation:
Replace traditional VPNs and pay only for the users who need application access, potentially reducing costs compared to other licencing models.

Don't wait for a security breach to happen! Equip yourself with the tools you need to secure your customers' future.
